

ABOUT US

Our carpets are manufactured on-demand using the so-called innovative "robot tufting" process. This contemporary, digital and automated process is complemented by the loving handwork of skilled carpet experts. The high-quality new wool used comes from EU and is of course mulesing-free.

Most important potentials of the robot tufting process is the precise translation of graphic designs into a carpet product. With its ability to combine high quality, sophisticated aesthetics and environmental compatibility, this innovative method offers the right conditions for any order to be made in individual design, shape and size.

WHAT WE DO ?

Our rugs are made with high-quality antiallergic materials that withstand heavy foot traffic. Suitable for various business environments including offices, hotels, restaurants and retail stores.

PRODUCTION STYLE: WOOL / VISCOSE

PRODUCTION STYLE: WOOL / VISCOSE

Multi-level cut pile

Loop, Cut

ARTIFICIAL GRASS

Customized artificial grass,
Mostly used for outdoor use or
entrances, with high endurance
towards dirt, rain, snow
and other weather conditions

USED MATERIALS

100% Wool

Viscose

Wool yarn is derived from the fleece of sheep or other animals. It's valued for its warmth, elasticity, and moisture-wicking properties.

Viscose yarn is a synthetic fiber made from natural materials such as wood pulp. It's known for its softness, smooth texture, and ability to mimic the qualities of natural fibers like silk.

BACK SIDE OF CARPET

To ensure a long service life and the best product quality, the fixing is double-sealed with a second coating in the further process, into which a cotton fabric is incorporated for reinforcement. After this process, the carpet is carefully sheared to create an even surface. Finally, the edges of the carrier cloth are folded over by hand and provided with a robust textile band made of cotton.

PRICING

Wool / Viscose 290 EUR per m² + (depending on work complexity)

Artificial Grass 150 EUR per m² + (depending on work complexity)

DELIVERY TIME

1 month + (depending on work complexity)
